

M.SAI PAVAN NIKHIL

B-202, Rajvansh Residency, Lucknow | +91 98660 29547 | saipavannikhil17@gmail.com

EDUCATION

2019 – 2023

B-TECH: Computer Science Engineering

GITAM DEMEED UNIVERSITY, HYDERABAD

CGPA : 8.22

PROFESSIONAL SKILL

Leadership Time management
Teamwork Supporting team members
communication

TECHNICAL SKILL

HTML C php Bootstrap
CSS MySQL Java Laravel
JavaScript Python Express PostgrsSQL
Spring Boot NodeJS Oracle SQL

PERSONAL PROJECTS

E-mail spam classification

November 2022

- Preprocessed and analyzed 10,000+ email records using natural language processing (NLP) techniques to develop a robust spam classification model.
- Applied machine learning algorithms, including Random Forest and XGBoost, to achieve a 98% accuracy rate in the spam detection system, enhancing classification efficiency.

Zero-Shot Text Classification Using Machine Learning

May 2023

- Developed a zero-shot text classification model that accurately classifies text data into categories without requiring labeled training data for each category.
- Utilized advanced machine learning algorithms and techniques such as BERT and GPT-3 to enable robust and scalable text classification.

INTERNSHIPS

MySql with Spring Boot | VERZEO

October 2021

- project on University Management with spring boot.
- Project: <https://github.com/SaiPavanNikhil/major-project.git>.

Back-End Engineering Virtual Experience Program forage | LYFT

June 2023

- Taking over development of an unfinished project for the Lyft Rentals team.
- Project: <https://github.com/SaiPavanNikhil/LYFT-virtual-internship.git>

WORK EXPERIENCE

NOC Engineer | TEXES Connect Pvt Ltd

December 2024 – May 2025

- Monitored and maintained a network infrastructure supporting over 500+ endpoints, ensuring 99.9% uptime during the month.
- Resolved 10+ daily tickets related to connectivity, hardware malfunctions, and network alerts, achieving a 90% first-call resolution rate.
- Collaborated with a team to manage 24/7 monitoring of critical systems, responding to 15+ incidents per week and escalating issues when necessary.

Associate Software Engineer | Ignitia Infotech

June 2025 – Present

- Working on an enterprise ERP application, contributing to development and maintenance of multiple modules.
- Developing and enhancing frontend pages and backend APIs based on business requirements.
- Debugging and resolving user-reported and production issues by analyzing logs and fixing code defects.
- Updating existing code and building deployment artifacts (WAR files and frontend production builds) for server deployment.
- Tech Stack: Java, Spring Boot, Angular, PostgreSQL, REST APIs
