

M.SAI PAVAN NIKHIL

Software Engineer

+91 98660 29547 saipavannikhil17@gmail.com [Linkedin](#) India

SUMMARY

I am a proactive software engineer with a robust background in developing sophisticated applications and a solid foundation in network management. My academic accomplishments include achieving an 8.22 CGPA in Computer Science Engineering and developing advanced projects that leverage machine learning. Committed to high-quality work and continuous learning, I thrive in collaborative environments and have proven my ability to swiftly resolve technical challenges

EXPERIENCE

NOC Engineer

12/2024 - 05/2025

[TEXES Connect Pvt Ltd](#)

Provides network infrastructure support

- Monitored network infrastructure supporting 500+ endpoints and maintained high service availability.
- Resolved daily tickets for connectivity, hardware, and alerts with strong first-call resolution.
- Supported 24/7 monitoring and incident escalation for critical systems.

Associate Software Engineer

06/2025

[Ignitia Infotech](#)

Focuses on software development for business applications

- Highlight your accomplishments, using numbers if possible.
- Developed enterprise ERP, e-ticketing, and AI proctoring modules using Angular, Java Spring Boot, Python, and PostgreSQL.
- Built REST API integrations, dynamic UI components, booking workflows, CRUD features, and dashboard functionality.
- Integrated AssemblyAI speech-to-text and browser text-to-speech capabilities for automated interview/proctoring flows.

EDUCATION

B-TECH: Computer Science Engineering

HYDERABAD

GITAM DEEMED UNIVERSITY

08/2019 - 05/2023

INTERSHIPS

MySql with Spring Boot | Verzeo

project on University Management with spring boot.

Project: <https://github.com/SaiPavanNikhil/major-project.git>.

Back-End Engineering Virtual Experience Program forage | LYFT

Taking over development of an unfinished project for the Lyft Rentals team.

Project: <https://github.com/SaiPavanNikhil/LYFT-virtual-internship.git>

SKILLS

Gmail, HTML, Bootstrap, CSS, Java, JavaScript, Python, SpringBoot, Node.js, Oracle SQL, NLP, GitHub, Angular, PostgreSQL, REST, MySQL

PROJECTS

E-Ticketing System (Counsil of Science and Technology)

Developed a robust spam classification model

- Built a full-stack booking platform using Angular, Spring Boot, and PostgreSQL.
- Implemented APIs, validations, role-based workflows, CRUD operations, and responsive UI components.
- [E-tickting system](#)

Enterprise Resource Planning

Short summary of your work

- Developed ERP modules for vendor management, purchase orders, inspections, dispatch tracking, and reporting.
- Integrated REST APIs, PostgreSQL connectivity, multi-tenant database switching, and dashboard UI features.
- [ERP](#)

AI Proctoring System

Short summary of your work

- Built an AI-based interview and proctoring platform with scheduling, monitoring, and speech-to-text features.
- Integrated Angular frontend modules with Python backend services for candidate tracking and session handling.
