

M.SAI PAVAN NIKHIL

Software Engineer

+91 98660 29547 saipavannikhil17@gmail.com Lucknow

SUMMARY

I am a proactive software engineer with a robust background in developing sophisticated applications and a solid foundation in network management. My academic accomplishments include achieving an 8.22 CGPA in Computer Science Engineering and developing advanced projects that leverage machine learning. Committed to high-quality work and continuous learning, I thrive in collaborative environments and have proven my ability to swiftly resolve technical challenges

EXPERIENCE

NOC Engineer

12/2024 - 05/2025

TEXES Connect Pvt Ltd

Provides network infrastructure support

- Monitored and maintained a network infrastructure supporting over 500+ endpoints, ensuring 99.9% uptime during the month
- Resolved 10+ daily tickets related to connectivity, hardware malfunctions, and network alerts, achieving a 90% first-call resolution rate
- Collaborated with a team to manage 24/7 monitoring of critical systems, responding to 15+ incidents per week and escalating issues when necessary

Associate Software Engineer

06/2025

Ignitia Infotech

Focuses on software development for business applications

- Worked on enterprise ERP, e-ticketing, and AI-based proctoring systems using Angular, Java Spring Boot, Python, and PostgreSQL. Developed dynamic frontend modules, REST API integrations, booking workflows, dashboards, CRUD operations, and database functionalities. Contributed to user-side ticket booking features, real-time workflow handling, and enterprise management modules. Integrated AssemblyAI Speech-to-Text and browser-based Text-to-Speech functionalities for automated interview and proctoring processes.

EDUCATION

B-TECH: Computer Science Engineering

HYDERABAD

GITAM DEEMED UNIVERSITY

08/2019 - 05/2023

KEY ACHIEVEMENTS

E-mail Spam Classification

Achieved a 98% accuracy rate in a spam detection system using advanced machine learning algorithms

Zero-Shot Text Classification

Developed a zero-shot text classification model leveraging BERT and GPT-3 for robust text identification

SKILLS

Gmail, HTML, PHP, Bootstrap, CSS, Java, Laravel, JavaScript, Python, SpringBoot, Node.js, Oracle SQL, NLP, Random Forest, XGBoost, GitHub, Git, NOC, ERP, Angular, PostgreSQL, REST

PROJECTS

E-mail Spam Classification

11/2022 - 11/2022

Developed a robust spam classification model

- Preprocessed and analyzed 10,000+ email records using natural language processing (NLP) techniques
- Applied machine learning algorithms, including Random Forest and XGBoost, to enhance classification efficiency

University Management

10/2021 - 10/2021

Developed an application for managing university operations

- Worked on a University Management project using Spring Boot

Zero-Shot Text Classification Using Machine Learning

05/2023 - 05/2023

Created a scalable text classification system

- Developed a model that classifies text into categories without labeled training data
- Utilized advanced machine learning algorithms such as BERT and GPT-3
